Platform Linked
Data Nederland

Program (1/3)

Ontwikkeling & Inspiratie blok (English)

13:10 Stappenplan voor Linked Data toegepast in de Energie

Maarten Steen (TNO)

13:35 Interactive Visualization of Linked Data with SynerScope

Willem van Hage (SynerScope)

14:00 Linked Open Data website @ NXP

Parvathy Meenakshy (NXP)

Platform Linked
Data Nederland

Programma (2/3)

*Platform Linked Data Nederland Blok
(Nederlands):*

14:10 De briljantie van SPARQL

Dimitri van Hees (Freshheads)

14:25 Uitleg Plannen Linked Data Nederland

Erwin Folmer (Geonovum/TNO)

15:05 Pauze met Ideeën markt

Platform Linked
Data Nederland

Program (3/3)

International Linked Data blok (English):

15:30 – 16:15 Linked Data Next

Phil Archer (W3C)

16:15 – 16:35 Business motivation for linked geodata

Anders Östman (Novogit AB, Sweden)

16:35 – 17:20 Creating knowledge out of interlinked
data – from big data to smart data

Sören Auer (Fraunhofer, University of Bonn)

17:20 Afsluiting & Borrel

Platform Linked
Data Nederland

Platform Linked Data Nederland plannen

- De Linked Data community opbouwen en faciliteren
- Kennis over Linked Data verspreiden
- Organisatie van de evenementen

Ondersteunen van de community in:

- Projecten
- Publicaties
- Educatie
- Website / Wiki
- Linked Open Data Service
- Platform (Almere Big Data Value Center)

Platform Linked
Data Nederland

Korte Updates

- Plannen werkgroep Aanpak Basisregistraties – Arjen Santema (Kadaster)
- Plannen basisregistratie BGT – Linda van den Brink (Geonovum)
- Plannen werkgroep URI Strategie – Marijke Salters (Forum Standaardisatie), Hans Overbeek (KOOP)
- Plannen LOD Service – Genealogie – Bob Coret
- Plannen Onderwijs – Allard Strijker (SLO)
- Plannen SPIDER – Mark Opmeer & Xander Wilcke (VU & Geodan)
- Stand van zaken Wiki & Platform – Pieter van Everdingen (OpenInc) & Gerard Persoon
- SKOS op de pas-toe of leg-uit lijst – Jan Voskuil (Taxonic)
- Terugkoppeling Hackalod – Stephan Kienhuis (CUBISS)

EU commits €14.4m to support open data across Europe

New funding for startups, research and academy hopes to fuel open-data skills and adoption through the Open Data Institute co-founded by Tim Berners-Lee

The European Union has committed €14.4m (£11m) towards open data with projects and institutions lead by the Open Data Institute (ODI), Southampton University, the Open University and Telefonica.

The funding, announced today at the ODI Summit being held in London, is the largest direct investment into open data startups globally and will be used to fund three separate schemes covering startups, open data research and a new training academy for data science.

“Open data has the potential to radically change the way organisations value data,” said Elena Simperl, associate professor at the University of Southampton. “An incubation program like ODInE’s will offer small and medium innovators in this space mentoring, technology, and financial support, helping to build a business network around open data across Europe.”

“ODInE stands for those entrepreneurs, startups and small to medium sized enterprises that wish to use open data to create economic and social value,” said Daniel Dietrich, co-founder and chairman of Open Knowledge Foundation in Germany. “This is the logical next step needed to grow the European open data ecosystem towards a sustainable data economy.”

‘Open Data currently only covers the tip of the public data iceberg’

A further €3.7m will be used to fund 15 researchers into open data posed with the question “how can we answer complex questions with web data?”. Two research posts will be made available for PhD students at the ODI and University of Southampton in the UK, University of Bonn and Fraunhofer in Germany, Université Jean Monnet Saint-Etienne in France and the University of Athens in Greece.

A third fund of €2.9m will be used to establish a new European Data Science Academy (EDSA) using e-learning technologies to create a new pan-European portal for analysing data and educating data scientists. The ODI and the Open University will lead the project with seven other organisations across Europe.

“Our experiences while building various open-data portals showed, that Open Data currently only covers the tip of the public data iceberg,” said Sören Auer, professor at the University of Bonn, and head of department at Fraunhofer. “Significant further efforts are required to increase the depth and breadth of available open data as well as to facilitate their integration and use to truly establish sustainable data value chains.”
